# TECHNICAL Requirements

## eI DIVÁN de la PELUQUERA

### HUMAN SITE SPECIFIC installation-performance

The Hairdresser's Divan is an installation for non-conventional interior spaces such as museums, cultural centres, universities or schools. The minimum space required is 30Mx15M, with natural light, or existing artificial illumination. It can be a diaphanous single space in which the whole installation is set up, or distributed throughout adjacent rooms.

Exterior and interior spaces need to be created, and marked out with fencing or similar means, in order to allow the public to watch from the outside and experience the three stations placed there, and which allows the public to decide if they would like to enter the installation.

The public can enter and leave freely, and the performer-monitor will ensure that the appropriate number of people for each space of the installation is respected.

The minimum entrance age is 12.

It is recommended that a person from the company visits the space beforehand in order to see it and make a set up plan. If this is not possible, then exact measurements and images of the space are required. The duration of each performance can vary from 2 to 3 hours depending on the agreement made with the organisers of the event.

## INFRASTRUCTURE

### Brought by the company

All materials for the setup of the 11 stations of the installation, and part of the furniture.

## INFRASTRUCTURE

### And materials provided by the organisation of the event

- 1 SBarber's or reclining chair.
- 1 Salon Hairdryer.
- 14 chairs.
- 2 small tables with drawers for the hairdresser .
- 1 Table, approx 1.80M x 0.80M x 0.75M.
- 1 Small carpet.
- 1 Sound equipment with USB connection.
- 3 Electricity points: 1 for a hairdryer -2000W, 1 for the video screen and 1 for the sound equipment.

In the event of the organisation not having the materials asked for, we suggest contacting charity shops, as our experience is that they will often loan items to support festivals.

If the furniture provided is vintage or similar in order to achieve a more attractive aesthetic for the installation, this is ideal.

We will provide advice for these materials, and help as far as possible in obtaining them.

## SETUP

- 8 h. 1 day before the first performance, with the team arriving two days before.

## TAKE DOWN

- 5h, after the last performance.

## STAFF

## SETUP AND TAKE DOWN

- 3 People, preferably the same team for both.

## MONITOR

- 11 person to stay at the entrance during the installation.

## DRESSING ROOM

Near the site, with good lighting and:

- 1 Table
- 3 Chairs
- Mirror
- Hangers for costumes
- Toilet
- Water
- Fruit
- Nuts
